

Dog DNA Collection

The dog DNA submission form with instructions and pricing are printed from your computer after signing up for a MyVGL account and placing an order.

Purchase interdental/gum brushes found at a pharmacy or drug store in the toothbrush/floss aisle.

The G-U-M Proxabrush or Go Be-tweens are one brand of interdental/gum brushes. You can use the brand of interdental/gum brush available in your store. **We require the wide/moderate interdental/gum brush the narrow/tight gum brushes will not be accepted.**

Use 4 interdental/gum brushes per dog.

Collect the DNA sample by swirling the interdental/gum brush against the cheek of the dog. Wave the brush in the air for 10-20 seconds. If a cap is available cap the brush.

After swabbing the cheek and gums place the 4 brushes into an envelope, seal the envelope and write the dog's name on the outside of the envelope.

Wash your hands before swabbing the next dog.
